

Retractable Enclosures

Cost-effective flexibility for industrial applications – from shop floor to dockside.

Extended

Retracted

This multi-purpose enclosure retracts quickly & easily, freeing up valuable floor space for other jobs when not in use.

Soper's retractable enclosures can be large or small. This installation, measuring 25' by 30', encloses a grinding operation when deployed.

Companies often require enclosures to capture, contain and control noise, dust or fumes. The aim is to maintain an ultra clean environment around a critical process.

Whatever the challenge, a Soper's retractable enclosure system has it covered.

Why retractable?

- Saves space; frees up floor space when the enclosure is not in use
- Enclose heavy parts that require overhead crane material handling
- Custom-designed for greater flexibility; large or small
- Can accommodate specialty exhaust or filtration systems, electrical connections, special lighting

Benefits

- Encloses critical processes for safer work environment
- Low installation cost
- Short lead time from design to start-up; little or no installation down time

Applications

Typical

- Grinding booth
- Blackout inspection
- Media blasting
- Flexible work station
- Cleanroom
- Over-spray
- Environmental enclosure

Specialty

- Barge covers
- Outdoor storage enclosures
- Canopies
- Roof or ceiling systems

Features

- Rugged, galv-alum scissor and frame modules joined to achieve desired enclosure size
- Stores in less than one-quarter of full deployment
- Floor space completely clear; no track hardware required
- Easily extended/retracted (manual or automated)
- Optional cross-flow air exhaust system enhances air filtration-equipped modules
- Full range of panel materials to meet unique application needs
- Clear or translucent ceiling and sidewall panels deliver a bright and airy operating environment
- Resealable velcro attachments
- Easy to assemble modular construction
