

## R-Rated SoftWall Options

Temperature & Climate Control Solutions

Cost-effective flexibility to meet rigid plant operations and design standards.

R-Rated SoftWalls enable a 3PL Warehouse to segregate & maintain tight temperature tolerances for a select group of pharmaceutical products.

Insulated SoftWalls, complete with clearview window strips, enclose and regulate the temperature above a mezzanine within a large distribution centre.

Extended canopy viewing area at ice level of a hockey arena covered with insulated architectural fabric roof panels.

Soper's adds non-woven polyester to its insulation options. R-rated solutions now range from high temperature and heat reflective to air conditioned applications, spanning Industrial, Food, Pharma, Nutraceutical and Agricultural industries.

The Soper's R-Rated SoftWall offers long-term operational cost efficiencies. They can be installed in a short time frame, without typical construction debris, allowing companies to maintain operations with minimal interruption or mess.

### Features:

- Tear and abrasion resistant
- Fungus and mildew resistant
- Dimensionally stable and shrink resistant
- High strength, low wick base fabric
- Inherently flame retardant
- Create temperature-controlled areas
- Short time for installation
- Lightweight, thin and flexible
- Food grade options

### Benefits:

- Control energy and operational costs
- Limited interruption and mess during installation
- Portability: Move easily when business needs change
- Customizable to meet specific industry requirements
- Acceptable to Class A building codes
- Optimize work/storage space
- Inventory segregation and protection

### Industries:

- 3PL Warehouses
- Food/Pharma/Nutraceutical
- Agriculture/Pet Foods
- Packaging and Process Control
- Quality Control Departments
- Laboratory Applications
