

SoftWall Clean Tunnels

The effective solution to process control challenges

Features:

- Clear view ceiling panels utilise existing overhead lighting
- Optional clear view, antistatic, wall panels
- Softwall panels attach to frames with quick release "hook and pile" fastening systems
- Variety of material choices available based on specific requirements: clear, opaque, fire retardant, non-fire retardant, anti-static, high heat, acoustical, chemical resistant, etc.
- Standard frame specifications 1½" sq 16 gauge galvalum steel tubing; 2" sq tubing used for roofs over 12'-0" wide
- Modular units designed for field assembly/interlocking with a bolt-through fastening system
- Optional door closures
- Optional clearspan drop ceiling mezzanine areas

Applications:

- Transfer tunnels
- Integrated process environments
- Clean Rooms
- Conveyor enclosures
- Integrated paint lines
- High tech welding

Benefits:

- Reduce defects and reworks
- Improve product quality
- Improve efficiencies
- Fully integrate complex, heterogeneous processes.
- Economical; unique softwall systems vs. traditional rigid wall construction
- Quick, efficient, clean installation processes
- Minimal lighting requirements
- Unlimited maintenance access
